a
test input
answer
26×27 cells → L = 728 tokens
task aa4ec2a5
b
Same adapter, same 180 s, two schedules
Equal slices: every view is stopped mid-grid
447 of 728 steps
442 of 728 steps
440 of 728 steps
438 of 728 steps
Length-aware schedule: the first views finish their grids
728 steps
4 grids
729 steps
4 grids
one greedy path: L · t ≈ 75 s
